ICICS 2021

Chongqing, China
Sep. 17 - Sep. 19, 2021

23rd International Conference on Information and Communications Security

The conference started in 1997 and aims at bringing together leading researchers and practitioners from both academia and industry to discuss and exchange their experiences, lessons learned, and insights related to computer and communications security.

Topics:

Original papers offering novel research contributions on all aspects of information and communications security are solicited for submission to ICICS 2021. Areas of interest include, but are not limited to:

Access control and authorization	Anonymity	Applied cryptography	Attacks and defenses
Authentication	Biometrics security	Blockchains and distributed ledger security	Censorship resistance
Cloud security	Cyber physical systems security	Distributed systems security	Economics of security and privacy
Embedded systems security	Forensics	Hardware security	Intrusion detection and prevention
Malware and unwanted software	Mobile and Web security and privacy	Language-based security	Machine learning and AI security
Network and systems security	Privacy-preserving data mining	Privacy technologies and mechanisms	Protocol security
Secure information flow	Security and privacy for the Internet of Things	Security and privacy metrics and policies	Security architectures
Social networks security, privacy and trust	Software and application security	Usable security and privacy	Trustworthy computing

Important dates:

Conference date: Sep 17-19 2021   Camera ready: Jul 13 2021
Acceptance notification: Jun 29 2021   Paper submission deadline: May 11 2021

General Chair:

Xiaofeng Liao, Chongqing University
Xiaohong Guan, Xi'an Jiaotong University

Program Chairs:

Debin Gao, Singapore Management University
Qi Li, Tsinghua University
